

Royal Street and St. Charles Street Drainage Improvements

Ward(s): 7
Project Manager: Gulfport Department of Engineering – Phone: (228) 868-5815
Engineer: G.E.C., Inc. – Michael M. Hattaway, (228) 863-8181

Total Approved Budget

Source	Amount
Gulfport – 2014 Bond Issue	\$ 200,000.00
Total	\$ 200,000.00

Project Scope

The project will improve drainage on Royal Street and St. Charles Street to the outfall at Qubbie Creek.

The project boundaries are generally Royal Street from Depew Rd. to the dead end at Qubbie Creek and St. Charles Street from Depew Road to the Hwy. 49 service road.

Work Completed

The Work Assignment was signed on October 1, 2015. Engineering work to date consists of assigning personnel to the project, meetings with the Gulfport engineering department, and topographic surveying. Topographic survey is now complete. The final plans were presented to the Engineering Department March 17, 2016. We responded to City plan review comments and re-submitted final plans on April 14th.

Work Planned

Work planned for the next reporting period is construction by City's contractor.
